FRANK McCARVEY

Not in a long time has Florence Rotary Club enjoyed itself as much as it did vesterday afternoon at the unite it's force with lodge and church regular Thursday luncheon when and all together stand. I mean not Frank McCravey entertained membership in song and story. Mr. McCravey has every right to be a headliner in leading chautauqua work, together, co-operate and win. Do we but he was elected to answer a high-, want a bigger city, a cleaner, better er call, and is doing a wonderful work town? Then get together, build it as a song evangelist and personal worker in his Master's vineyard. In Florence assisting Dr. F. H. Martin in the conduct of a series of revival meetings at the First Bantist Church it was Rotary's good fortune to have Mr. McCravev as its guest yesterday afternoon. He is an impersonator of rare ability and not only, this tells his vast fund of genuinely humorous stories with a skill that delights and charms. For nearly an hour he kept his audience shaking with laughter and then as a climax took the twentyone business men through a stunt that fairly took their breath away. Mr. McCravey is not a Rotarian himself as his work takes him from place to place, but he breathes its spirit and if he ever stone long enough in any town or city where Rotary exists or a field for its activities is found. International Rotary will cain a rich addition. It is sincerely honed that Frank McCravev will come this way often and ston long. He is good for the mind and for the heart and for

the soul. (Florence Daily Times.)

FOR GREATER **ALEXANDRIA**

Gorman Ridgely, of Downham and Ridgely Views Plans

Says he Thinks That Co-Operation, Appearances and Recreation are Essential Factors

In discussing the proposed provements for Alexandria with the Gazette's reporter, E. Gorman Ridgely, of the firm of Downham & Ridgely finds it hard to draw the line between the most important and the improvements because they are all important and none is to be rightfully set aside for another. He says that in his opinion:-

"First of all in the line of important improvements will be to get the citizens to work with a better spirit of cooperation and in more perfect unison for the civic betterment of the city. We can never accomplish the things we should accomplish with out the whole hearted cooperation of the entire body of the people. No thing can ever be accomplished with one pulling one way and another in another direction. We must pull to-gether for a Greater Alexandria if The Rev. Dr. Jno. Lee Allison will we wish to gain ground.
"When the new form of government

goes into effect we must all stand behind our representatives and give the new government our undivided support. It has been said that, 'a house divided against itself cannot stand,' and our 'house' of the new government must stand, therefore our suport of it must be undivided. "Possibly our proposed new school building will give to the city the quickest returns. It will better the conditions in more homes and quicker han any of the other proposed improvements, our children must be housed in comfortable quarters and at present, as we all know, the housing facilities of our schools are inade-

the grounds around the High School and around Washington School are far more important than many of our citizens suppose. It is to be remembered that a city is known by its schools. Well kept schools and well kept school grounds is one of the best of advertisements for a city. And as also is known if the outside is allowed to form his opinion of our city from the way its school grounds are kept at the present time his opinion would not flatter us in the least.

"Then the public recreation park is another thing that would be a great asset to our city; a place where the grown up could go to rest and to play after a hard day at his place of business. Play is an essential in the life of a man as it is in the bringing up of a child. Beside this, a park would be a place where man could Refreshments will be meet man—not as in business life-and discuss the present and the past and the future of the city in a way business conventionalities could never

"Yes if we are ever to realize a greater Alerndria, I think we must first realize that without co-opera The regular meeting of the Baraca this self-evident truth dawns upon Bible Class will be held tomorrow us. the quicker a Greater Alexandria morning in the First Baptist Church.

GREATER ALEXANDRIA

(For The Gazette)

For a Greater Alexandria we've material enough, but at the present writing, "It's diamonds in the rough." Some of it is somewhat green and School will play the team of Manas- some is rather tough, but most of it sas High School in the Armory Hall I'd have you know, is strictly A-1 stuff. This "stuff" consists of folks and friends-happy combinationlost a game so far, are anticipating a the very stuff we need to build a city or a nation. This stuff's all right if organized and fitted all together; but some of it is scattered Club Midgets, will ojurney to Washington, D. C., to meet the Fast Tiger around, exposed to all the weather. Some is warped and other twisted, somewhat damaged I'll admit, still, if handled carefully, its useful every

> But drop the figure, let us see, we've churches here a plenty, lodges, unions and "so forth," something over twenty. Let the churches wade right in. They should lead the fight for all that stands for betterment, for every thing that's right. Let the lodge co-operate, and every other band standing literally-that's where the troubles been-but stand united, go up, don't "kick" and tear it down.

Stella Tells Her Brownies How Ink Is Made.

hiding Octopus.

not help smiling at her clever little Brownia.

Snookums laughed and playfully pounded Pimzle on the shoulder.

"I wish." he cried, "that I could think as quickly as you do, old fellow!"

Pimzle looked awfully pleased, as he dearly loves a word of praise, which is not odd, for every one does.

If we always find fault with others it discourages them, and instead of giving and doing their best, which they think is not appreciated or even noticed, they think, "What is the use?" and make no effort or at least only a half hearted effort; but, on the other hand a word of praise every now.

noticed, they think, "What is the use?" and make no effort or at least only a half hearted effort; but, on the other hand a word of praise every now and then makes any one want to live up to it—makes one try—and when one tries one succeeds! So you see how important a bit of praise is! We all give out to others what they expect of us, whether it be good or bad.

Well, let's go back to Stella, the Brownies, Devil Fish and Ink.

Well let's go back to Stella, the Brownies, Devil Fish and Ink.

Stella was saying that as Devil Fish are ever so scarce the Sepia fluid of theirs also is; consequently Humans cannot depend on this means alone of making ink, but have to invent some other.

"And what did they invent, Stella?" asked Kinkajou; "tell us all about it."

"Have you ever noticed the leaves of an oak tree when little, hard, round

have you ever noticed the leaves of an oak tree when here, hard, round knobs have formed on them?"

The Brownies all nodded, for they had often wondered what these strange little growths were, which have two names, "Oak Apples" and "Gall Nuts," and which are in no way either fruit of acorns.

"There is a little insect called the 'Gall Fly' that is the cause of these knobs," the Fairy continued. Mrs. Gall Fly pierces a hole in the oak leaf

and lays an egg in it.

"The juices of the bruised leaf ooze up around the cut and by degrees form the Oak Apple or Gall Nut (you can call it which you like) around the baby fly, who when fully grown and ready to face the world pierces a hole in the 'apple' and files away. It has been feeding all this time on the inside

pulp of the apple.
"These Oak Apples are collected by Humans, pounded to a fine powder

"These Oak Apples are collected by Humans, pounded to a fine powder and boiled in water. This water becomes yellow, and is then mixed with more water in which some green Copperas has been dissolved"—
"What is Copperas?" asked the ever curlous Pimzle.

Stella smiled as she answered the little Brownie. "I don't know if I can make you guite understand, but I'll try. Copperas is obtained by allowing iron to stand in sulphuric acid. Of course, every one knows that sulphuric acid is a terrifically explosive their days has to be handled more than

acid is a terrifically explosive liquid, and has to be handled more than carefully. It is so strong that it absolutely melts iron. Well, when this Copperas water is mixed with the yellow

been bolled what is the result?"

"Can't imagine! What?"

HE Wishing Fairy had told her four Brownies that Sepia

(which is used by Humans to make ink) comes from the Octopus or Devil Fish. She had explained how even this dreadful creature of the ocean sometimes needs protection in spite of its deadly clinging arms, and how

when this is the case it pours forth a black fluid which colors the surrounding water. The water then becomes so dark that it is impossible to see the

"Perhaps," ventured Pimzle, thoughtfully, "that is what gave Humans the idea of pouring

The life story of this young hero out on the blood drenched land of is pathetic! In life and death he France in order that we may now was unknown, but true to the mark take heart and hope and look up of his high resolve was this splendid fighting youthful marine. When the the wide, wide world, these words tocsin of our nation resounded and aroused true manhood to arms he Oh men and brothers! let God's voice eagerly took his place in ranks and sailed away over seas with his command, an eighteen year old boy, and fought in every battle in the World War from the time America entered the conflict and died in action before attaining man's estate and on the day the Armistice was signed. Alas. what a melancholy truth to relate! His history is this:
"One cold Christmas night about

twenty years ago he was under a gas light on the side walk on one of the avenues of Baltimore, a deserted infant. He was conveyed by the natrolman who found him comfortable quarters where he was provided for until sent to Mount St. Marv's Industrial School, near Catonsville, Md., and there he grew in knowledge and usefulness, vet no one ever knew his name and from his boyhood to his last battlefield no one ever found out who he was.
One day as war clouds gathered

over our country, a squad of Marines with a recruiting officer motored out to St. Mary's and secured permission to place machine guns on the cam-pus and train the boys in the art of Arms. It was there and then that this young hero came before the public gaze and upon the field of national usefulness to prove his natriotic devotion. He wanted to be a Marine and nothing could hold him back, and after a short training with the guns on the campus, he enlisted in the service, with a short time at

a training camp and thence to the scenes of war. Because he had no name the recruiting officer signed him up as "Smith" and he soon grew in favor with his command because of his manly, noble nature and he was affectionately known as 'Smitty."

During the first Christmas in France the boys all received narcels from home-all with the exception of "Smitty"—he had no home and re-ceived no present. Some kind soul however, had sent over a big hox with the instructions and inscription. "For an Unknown Soldier" and Smit-ty got the hox. There was no one who had a hotter claim.

I have said that he was killed on the morning of the day of the Armis-Reaumont in the Meuse-Argonne bat tle. Frithful to comrades and country-a loval, roval American beloved he ever man in the command-the of the regiment, and when the great throng gathered at Arlington.
